

NAME:- AHUJA SLOCK

ENROLL NO:- 92400133041

SUBJECT :- DSC(C++)

1. Array :- Reverse the array

Code:-

```
class Solution {
```

```
public:
```

```
void reverseArray(vector<int> &arr) {
```

```
    int start = 0;
```

```
    int end = arr.size() - 1;
```

```
    // Swap elements from both ends until the middle is reached
```

```
    while (start < end) {
```

```
        swap(arr[start], arr[end]);
```

```
        start++;
```

```
        end--;
```

```
    }
```

```
}
```

```
};
```

output:-

The screenshot displays a C++ IDE interface. On the left, the 'Output Window' shows 'Compilation Results' for 'Custom Input' from 'Y.O.G.I. (AI Bot)'. It confirms 'Problem Solved Successfully' with 1115 test cases passed out of 1115, 1 attempt out of 1, 100% accuracy, 2 points scored out of 2, and a time taken of 0.07. Below this, it suggests solving 'Mountain Subarray Problem', 'Java ArrayList Operation', and 'Even and odd elements at even and odd positions'. On the right, the code editor shows the C++ code for reversing an array, which matches the code provided in the text. The code is in C++ (17) and includes a 'Start Timer' button. The bottom of the IDE has a 'Custom Input' field and 'Compile & Run' and 'Submit' buttons.
