

5 . move all negative elements one side of the array

Input:- class Solution {

public:

void Rearrange(int arr[], int n) {

vector<int> neg, pos;

// Separate negative and non-negative elements

for (int i = 0; i < n; i++) {

if (arr[i] < 0)

neg.push_back(arr[i]);

else

pos.push_back(arr[i]);

}

// Merge negatives and positives back into arr

int idx = 0;

for (int x : neg)

arr[idx++] = x;

for (int x : pos)

arr[idx++] = x;

}

};

code:-

```
1 class Solution {
2 public:
3 void Rearrange(int arr[], int n) {
4     vector<int> neg, pos;
5
6     // Separate negative and non-negative elements
7     for (int i = 0; i < n; i++) {
8         if (arr[i] < 0)
9             neg.push_back(arr[i]);
10        else
11            pos.push_back(arr[i]);
12    }
13
14    // Merge negatives and positives back into arr
15    int idx = 0;
16    for (int x : neg)
17        arr[idx++] = x;
18    for (int x : pos)
19        arr[idx++] = x;
20 }
21 };
22
```
